Food, Medicine and Healthcare  
Administration and Control Authority

June / 2012

Addis Ababa

## **Acknowledgment**

The Food, Medicine and Healthcare Administration and Control Authority of Ethiopia (EFMHACA) would like to extend its gratitude to the World Health Organization (WHO) for its technical assistance, meeting all financial expenses associated with consultative workshops and printing of the List of Medicines for health center. The Authority would also like to thank Management Sciences for Health/Strengthening Pharmaceutical Systems (MSH/SPS) for its technical support in revising this list. Last but not least, the Authority would like to give special acknowledgement to the National Drug Advisory Committee and all participants of the consultative workshops for their invaluable contributions in scrutinizing and finalizing this list.

## **Forward**

Pharmacotherapy has always been an integral part of health care system and will remain so in the future. This relies on the availability of safe, effective and affordable medicines with the required quality, in reasonable amount. Moreover, on the rational prescribing, dispensing and use of such medicines. Ethiopian drug policy ensures that medicines which are required for prevention, diagnosis, treatment, mitigation and rehabilitation of diseases affecting the majority of Ethiopian people have to be identified and classified to respective levels of health service delivery.

The List of Medicines for health center is hereby revised for the third time in light of the above principle and the latest developments in fields of medicine and pharmacy and considering the available health professional found in health center. Hence, users of this medicines list are advised to refer to the list whenever they provide the services in different health centers. It gives me a great pleasure to introduce this edition of the list to all beneficiaries, which is the fruit of the joint effort of the staff of the Authority, the National Drug Advisory Committee, development partners as well as the participants of the review workshops. I hope that the List of Medicine for health center will serve as useful guides for the procurement as well as to increase availability of medicine in the health center.

Finally, I would like to express my gratitude to all those who have directly or indirectly extended their helping hands in the revising and printing of the list. I also call upon health professionals and interested parties to continue their usual support in updating the list by forwarding comments and suggestions to the Food, Medicines and Healthcare Administration and control Authority of Ethiopia.

Yehulu Denekew Alemneh, Director General,  
Ethiopian Food, Medicines and Healthcare Administration and Control Authority  
(EFMHACA).

## **Introduction**

It is by far known that medicines are integral components of a health care system. Although there are immense active pharmaceutical entities in the global market, limiting medicines that shall be used within a given health institution is advantageous for proper management of medicine with in a facility. This is done with due regard to factors like; safety, efficacy, quality, cost- benefit ratio, indication for treatment of diseases which is prominent in health center, sufficient experience with the medicines, health professional available in the facility and other factors. Pharmacotherapy classification of medicine was utilized to categories medicines for the health center.

After five years of use, the second edition of the List of Medicines for health center is now revised in light of the latest development in the fields of medicine and pharmacy besides to this the Authority included some of medication which was requested to be included in the second edition. As customary, the purpose of the third edition of List of Medicine for health center is to provide up-to-date list of medicine for the health center, to improve procurement, to increase availability and to promote proper use of Medication.

The draft of the revised edition was first prepared by the Authority using a technical working group composed of General practitioners, a nurse and pharmacists and then enriched through national consultative workshops. Participants involved in the workshops were specialists and other health professionals from various disciplines. i.e. Nursing, Pharmacy, Cardiology, Dentistry, Dermatology, ENT, Internal Medicine, Neurology, Obstetrics & Gynecology, Oncology, Ophthalmology, Pediatrics, Psychiatry and Surgery; representatives of teaching institutions, professional associations, regional health bureaus, relevant departments of Ministry of Health, pharmaceutical manufacturers & importers, government hospitals and other related organizations. Soon after, the revised version of List of Medicine for health center was finalized by the National Drug Advisory Committee.

In the course of reviewing the previous edition, medicines which are obsolete, less effective, with low benefit to risk ratio and superseded by better ones have been deleted while medicines with better quality, safety and efficacy profile have been included. Except for the addition of some new categories, the pharmacotherapeutic classification system that was used in the previous edition is still maintained. Consequently, all users of this list are strongly invited to send their comments and suggestions to the Food, Medicine and Healthcare Administration and Control Authority of Ethiopia, P.O. Box 5681, Tel. 251-11 552 41 22, [WWW.fmhaca.gov.et](http://WWW.fmhaca.gov.et) Addis Ababa, Ethiopia.
